

## **Cypher V: William & Mary's 5th Annual Hackathon**

### **Who are we?**

We are a group of students from William and Mary's Association for Computing Machinery chapter who are passionate about technology and creating an environment for innovation. Cypher V is the product of collaboration between students, faculty, organizations, companies, and outside individuals to create an environment for students of all skill levels to collaborate, innovate, and learn.

### **The Hackathon**

Cypher V is a 32-hour software and hardware competition taking place March 22<sup>nd</sup>-24<sup>th</sup> on the William & Mary Campus in Earl Gregg Swem Library. Students are not restricted in the scope of their projects: we have had projects ranging from encrypted pastebins, to drones that were able to identify and follow people around and even self-defense roombas. Over the 32 hours, students will come up with their idea, build a prototype from the ground up using software and hardware, present their ideas and products to judges and potentially win prizes. Veteran hackers will be quite accustomed to such a setup and some may even come with an idea of what they want to build. We're also building our hackathon around being accessible to beginners. To support these students, we offer a series of tutorials to help them learn the ropes of some common technologies, and plan on expanding judging criteria to provide more competitive options that may be appealing to novice coders. Sponsor-provided mentors will also be on hand to offer their more advanced knowledge to students.

### **Benefits**

Our sponsors make this event possible. In return, we want to help our sponsors reach their goals. Cypher V is a unique networking and recruiting opportunity, allowing sponsors access to technically-minded students from William & Mary and many other universities. Sponsors get to know participants over the course of the weekend, but also receive resume information from our hackers. Students become familiar with your company through face-to-face interaction with your recruiters or sponsor-provided mentors, and from brand recognition on our swag and promotional materials.

## Questions?

Our team will be happy to answer any questions you may have. Please email us at [cypher.wm@gmail.com](mailto:cypher.wm@gmail.com), or email our lead organizer, Alex Fantine, directly at [ajfantine@email.wm.edu](mailto:ajfantine@email.wm.edu). Information on previous hackathons can be found at [tribeHacks.com](http://tribeHacks.com).

## Sponsorship Tiers

We rely on our sponsors to help us make the event as comfortable as possible for our hackers. Sponsor money goes into food, prizes, travel reimbursements, hardware, and supporting future hackathons. Listed below are our standard sponsorship tiers, but we will also work with your company if you have additional requests.

<b>Benefit</b>	<b>Bronze \$750</b>	<b>Silver \$1,500</b>	<b>Gold \$3,000</b>	<b>Platinum \$5,000+</b>
